
Completing Tests on Time

Test taking is its own skill. It is important to approach questions strategically and to keep track of time.

Step 1. Read the Directions.

- Read the directions and put them in your own words.
- If you do not understand a certain part of the instruction, ask the instructor for help before beginning the test.

Step 2. Look over test.

Decide how much time to spend on each test item

1. Figure out how much time you have to finish the entire test. (e.g. 60 minutes)
2. Figure out the total number of questions on the test. (e.g. 30 questions)
3. Divide the total time (60 minutes) by the total number of questions (30 questions): 60/30 = 2. You have 2 minutes to spend on each test question.
4. Think about why you need or want to do each of these things

If you can't figure out how much exact time to spend on each question, just estimate. This will keep you aware of time and move you along so that you don't spend too much time on one question.

Answer the easiest questions first

Answer questions that are worth more points first

Skip a question if you are stumped and come back to it later
